Procedure of php test:

You need to develop only by raw php or core php, without using framework
You have to develop, property portal website.
It will be kind of web portal for property agent, where some property agent can post about property in the site.

PDF:
https://www.dropbox.com/s/23gr5qptqw4abqv/%E9%96%8B%E7%99%BA%E3%83%86%E3%82%B9%E3%83%88.pdf?dl=0

Download this. In this PDF you can see the flowchart of the work. So that you will know how is it.

1 Top page
2 Property list page- i) 2 sub hierarchy page

In the test, you don't need to make system panel(administrator panel), You have to make database in mysql.
You have to put value to database directly
You should make dynamic content in only user site.
You can insert dummy content in database manually.

You don't have to develop for posting data panel, just put your data manually in DB

Please do the following,

- **Please record the screen share video of your test work and share me by youtube url.**

- **Send me the zip file of your test work after completing.**
